50 YEARS OF EXPERIENCE

Italsabi is a service company specialized in **NDT** (non-destructive testing), heat treatments and plant inspection. Established in 1973, it operates on a national and international scale with a strong presence in the major chemical and petrochemical industrial hubs. The know-how achieved derives from experience gained in over 45 years of activity, a long period in which Italsabi has carved out a prestigious role in its reference market. Italsabi operates according to its own Quality System, certified in compliance with the

ISO9001:2015 standard and as accredited laboratory for NDT according to the standard UNI EN ISO/IEC 17025.

Italsabi has third levels qualified personnel according to the ISO9712 standard and SNT-TC-1A in the UT - VT - MT - PT - RT - PHASED ARRAY-TOFD methods. Italsabi has an internal written practice for the training and qualification of its staff according to the SNT-TC-1A ed. standard. 2006 and 2011. Italsabi third levels provide the necessary support to our customers during the ASME joint review phases.

Our Strength

Faster

Higher flexibility in the Inspection executions, always oriented to the client needs and timing

Coverage

Capillarity in the territory, from North to South, that means reducing the distance from the customer

80 technicians

80 qualified technicians level 2 ISO9712 / SNT-TC-1A which allows Italsabi to deal with large activities

Versatility

Supplying quality services from the biggest petrochemical plant to the smallest foundry

Technology

Always the latest equipment and tools technologies for our technicians

Training center

Constant training of personnel in the security field and in the various control methods

NON DESTRUCTIVE TESTING

OUR SERVICES

- AE - Acoustic Emission
- BRICK - Tank Shell Thickness Inspection
- ET - Eddy Current
- FLOORMAP - Magnetic Flux Leakage
- HT - Hardness Testing
- IRIS
- WELDING INSPECTORS
- INSPECTION & EXPEDITING
- QA QC INSPECTOR
- MRT - Magnetic Rope Test
- MT - Magnetic Particle Inspection
- LRGW- Long Range Guided Wave
- P-SCAN
- PEC - Pulsed Eddy Current
- PAUT - Phased Array & Tofd
- PMI - Positive Material Identification
- PT - Liquid Penetrant Inspection
- RT - Bunker
- RT - Industrial Radiography
- UAV - Drone Inspection
- IR - Infrared Thermography
- HT - Heat Treatment
- UT - Ultrasonic Inspection
- UTD - Ultrasonic Defectoscope Inspection
- UTS - Ultrasonic Thickness Measurement
- VT - Endoscopic Control
